

Anne Rushing named Senior Director, Plant Director of Monogram (MRO) Refrigeration

I am pleased to announce that **Anne Rushing** has been named the **Senior Director, Plant Manager** role for our Monogram Refrigeration plant; which builds Monogram and Profile brand refrigerators, and Zoneline plant; building two of their product lines, reporting directly to me. Anne has held a variety of roles of increasing scope and responsibility over her 30+ year career. In her most recent role, Anne served as the Quality leader of our Monogram and Zoneline plants.

Anne started her career as a Test Engineer for United Technologies and then Rockwell Automotive before moving to the Appliance industry. She started her Appliance career as a Reliability Engineer, ultimately becoming the Plant Manager for the Maytag Dishwasher plant in Jackson, TN. Throughout her time at Maytag, Anne was able to help transform their Dish plant into the Shingo prize winner. The Shingo prize is an award for a lean plant transformation given yearly to a plant which has distinguished itself as the best example of lean transformation in North America. Anne continued her career with Whirlpool in multiple capacities over the next several years before becoming VP of Operations for Marmon Water Retail Group.

Throughout Anne's career, she has kept the same practices in mind - working together as a team to deliver a common goal and learning and growing as individuals and a team. Anne's passion is finding the means to identify and eliminate waste in all areas of the value stream in order to create long-term viability and sustainability, which will provide a solid future for many generations.

When not at work, you can find Anne spending time with her children and watching her grandchildren participate in various sports and activities. She enjoys outdoor activities, including walking and grilling, and bird watching.

Anne's experience and eagerness to collaborate and progress will be key to continuing the developing the great culture we have at our plants in Selmer as well as our overall growth of GE Appliances. She will be transitioning into this role effective immediately. I look forward to her valuable contributions and leadership of the Selmer team.

Please join me in congratulating Anne in her new role!
